

HOW TO MAKE A TWISTED CORD

Cut one or two long lengths of yarn depending on how thick you want your cord. It needs to be approximately four times the finished length you require as it will shorten when twisted. Fold the yarn in half and place the folded end of yarn over door knob or anything that can hold it taught. You should have the ends in your hand. Then twist and twist until very tight. You must stand back so the yarn is at its full length. Then end you are holding and twisting together with the end on the door knob still keeping yarn taught. Take hold in middle of both pieces, remove from door knob and shake the yarn it will twists itself together. Tie each end with a knot and you have a great twisted cord.
